

RN Professional Advancement through Certification

Professional advancement opportunities are also available through certification in a nursing specialty. There are over 30 nursing specialty areas with which national certification can be obtained. The areas of certification range from Addiction Specialist to a specialist in Urology Nursing. The American Nursing Credentialing Center and a variety of nursing specialty organizations offer examinations for certification. Many employers offer a financial incentive to nurses who obtain certification in a specialty area. To check out the qualifications and the process for earning certification in a specialty area, click on the link below.
