

ATTENTION NURSES: Participate in the NSSRN

Invitations to complete the **National Sample Survey of Registered Nurses (NSSRN)** were recently sent by mail to select nurses across the country. This is the longest-running survey and primary source of data on the nursing workforce in the US. The Health Resources and Services Administration (HRSA) who conducts the survey needs your help to achieve a strong response rate.

What You Can Do

- Watch for a letter in the mail from the US Census Bureau
- If you received one, complete the survey
- Encourage your peers to complete the survey if they received one

Thank you for supporting the NSSRN.

Your assistance helps ensure accurate, comprehensive data to guide the future of the nursing workforce.
