

NEW JERSEY ORGANIZATIONS OF NURSING EMPOWERED (ONE) COALITION

MISSION

Educate policymakers on select nursing and healthcare topics of common interest shared across New Jersey professional nursing organizations. This will be accomplished through collaboration and advocacy efforts grounded by collective nursing expertise and quality data evidence.

The coalition is prepared to deliver testimony in support or opposition of legislation and provide consultative guidance to policymakers and stakeholders. This group is not a lobbying organization and thus is prohibited from using funding or contributions to influence policy.

The NJ ONE Coalition aims to:

- Bridge advocacy activity with NJ's professional nursing organizations.
- Educate policymakers and stakeholders with consistent messaging based on nursing expertise.
- Identify data needs for policy education and advocacy.

VISION

New Jersey policies will promote the nursing profession for safe, quality, equitable and reliable health care.

HOW WE WILL OPERATE

The New Jersey Collaborating Center for Nursing at Rutgers Nursing will serve as the lead agency and identify the Chairperson. Subgroups will be formed with facilitators, as defined by strategic objectives. Meetings will be held regularly according to Robert's Rules. The agenda will include a discussion of priority bills with updates provided by member organizations and subgroups. All organizations may not support all bills or aspects of bills. However, communications will reflect the coalition's values with a focus on legislative solutions to our state's health care needs.
